## NOTES:

Heroes are tested using a fixed Challenge: Ra (1st Hero), K.N.Y.F.E. (2nd Hero), Hero being tested vs. Baron Blade @ the Mobile Defense Platform. Challenge is repeated until 5 victories are recorded. Except for Win Percentage, statistics are based only on the victorious Challenges. In addition two Deck-based statistics are used: number of Support cards (those that assist other Heroes: Healing, Damage Buffs, Search Cards, etc.), and the number of cards that allow for Ongoing card Destruction.

Derek Quintanar supplied the stats for Harpy (v5 Playtest), Hype, Hypothermic, Nevermore, Pinion, Semi-Heroic Baron Blade, and Sky-Scraper: Extremist.

If the Official Sentinels of the Multiverse Heroes fall along a normal distribution:

68.2% of them should be within +/- 1 Standard Deviation of the the Mean for each statistic recorded.

86.6% should be within +/- 1.5 Standard Deviations.

95.4% should be within +/- 2 Standard Deviations.

98.7% should be within +/- 2.5 Standard Deviations.

And 99.6% should be within +/- 3 Standard Deviations.

# NOTES

Rainbow (Paul Watson's Revolution) originally tested high on Survivability. But I suspected that I had made mistakes during testing (not correctly accounting for the effects of Rainbow's global damage boosts on Villain and Environment targets). I re-tested her using the OblivAeon damage-type counters to keep track and three of her five wins were very narrow victories, bringing her Survivability back to acceptable levels (while bumping her PRDO up by a full point).

"Semi-Heroic Baron Blade" is officially known as "Baron Blade, Hero, for the Moment," and was created by Braithwhite (aka now-a-GtG-employee Chris Burton). Art is mostly by Adam Rebotarro, with the rest swiped from the Internet. Cards were assembled by MJA. Despite adjusting his cards (both to lower the power level and to standardize wording), he still tested too strong and has been banned.

Koga's Whiplash (his unfinished Champions of the Multiverse expansion) joined Freedom V Support Deck and Semi-Heroic Baron Blade in the banned from play pile.

Vincent St. Vincent as tested is right on the verge of unacceptably high Survivability (having equaled Omnitron-X's .59 (+2.99 SD)). Given that and some other impressions from testing, I will likely rebuild his deck. However, both his and Olliebear's deck were not meant to be serious decks and as such, I may just overlook their flaws.

OblivAeon-era Official Heroes are NOT being used to adjust the Official Means and Standard Deviations, due to the general impression (born out through the first four Heroes tested) that these Heroes are generally more powerful than the first 26.
