#1001: Digital Trio (9 May 2019)

Ra (13) / Fanatic (16) / Tempest (12)
vs. Citizen Dawn @ Mobile Defense Platform // Won

#1002: Digital Trio (9 May 2019)

Ra (6) / Fanatic (0) / Tempest (0)
vs. Dreamer (4) @ Realm of Discord // Won
Ra was down to 1HP two rounds before the game ended; incap abilities were critical to the win.

#1003: Digital Trio (10 May 2019)

Ra (21) / Fanatic (17) / Tempest (20)
vs. Chokepoint @ Wagner Mars Base // Won

#1004: Digital Random (11 May 2019)

#1009: Game Night @ Dan's House (15 May 2019)

Tasha / Akash'Thryia (0)
Dan's brother / KNYFE (2)
Dan / Pyre (0)
MJA / Slumming Gods Team 7
vs. The Chairman
@ Champion Studios

NOTES:

(1) Going up against one of the most difficult Villains in a difficult Environment was probably not a great plan. Team took 10 damage mid-game from the Environment, which later knocked out Pyre, and only Akash Seed shenanigans prevented it from taking us all out.

(2) Playing by the Video Game rules we would have lost as the Chairman's strike-back damage would have occurred between Team 7's 1 Melee and 1 Projectile Damage, knocking them out and KNYFE would not have survived the Chairman's next Turn. Using the card-game-only rules of "simultaneous actions occur in the order of the player's choosing" we decided that both of Team 7's "simultaneous" attacks occurred before the Chairman could react, thus winning the game.

(3) Pyre's incap "Discard 2 to Draw 2" allowed Team 7 to Draw Fairchild, which gave Team 7 the bonus needed to actually hit the Chairman for the 4 damage needed to finish him.

[6th Game Night appearance in 49 Weeks (as of 5/18) = 12%, 1 in 8]

#1010: Digital Team Freedom (19 May 2019)

Legacy (20) / Ra (25) / Fanatic (21) / Tempest (17) / Heroic Luminary (19)
vs. Deadline @ Ruins of Atlantis // Won

#1011: Digital Random (19 May 2019)

Ra (5) / Idealist (0) / Stuntman (16)
vs. Ennead @ Omnitron-Iv // Won

NOTE: Personal SotM Hero Collection

At this point I have **87 Hero Decks** in my collection:

Official: 37 SotM

Licensed: 0 SoEP + 22 Cauldron [59]

2nd Party: 6 Crisis + 1 Wonder Comics [66]

3rd Party: 21 [87]

Adelphophage: 3

Buffyverse: 0

Chris Burton/Braithwhite: 0

FlatOnHisFace/Order of the Rose: 0

Freedom Force: 8

KillerShrike: 0

MLPverse: 0

Overtime Comics: 3

Paul Watson: 2

Phantaskippy: 0

Miscellany: 5

Charlie, Geisha, Harry Dresden, Icegirl, Kali

Adding no additional Hero Decks, ***I automatically jump to 99*** when Earth Prime ships (around September 2019, best guess right now), so if I want a particular Hero (Sentinel) to be #100 to enter my collection, I have two options:

(1) Wait for Earth Prime and then add Sentinel.

(2) Add 12 Heroes and then add Sentinel.

At this point I have Sentinel (ready to print) plus 11 other Heroes who could allow me to make a run at method 2:

Ready for Testing: Commonwealth.

Printed/not Laminated: Enyo, Whiplash, Timepeace, Eirelle, S.H.B.B. (DQ previously tested him as high on Survivability), Xander, Apple Jack, Ishtar.

Ready for Formatting: Scything, Green Death.

So I still need one Hero (to be #99), plus possible replacements if one or more of the above Heroes tests unacceptable high on Survivability or PRDO.

#1012: Third-Party Hero-Testing: Commonwealth (#1; 21 May 2019)

Ra/KNYFE/Commonwealth vs. BB @ MDP

Win 1 or 5 / Flip 4 / Win 5

HP: Ra .23 / KN .17 / Cw .00

DO: Ra 29 / KN 56 / Cw 39

PRDO: Ra 5.8 / KN 11.2 / Cw 9.8

Share: Ra .23 / KN .45 / Cw .32

NOTE: Ra played Imbued Fire on Round 1.

#1013: Third-Party Hero-Testing: Commonwealth (#2; 22 May 2019)

Ra/KNYFE/Commonwealth vs. BB @ MDP

Lost when Ra was incapped in Round 6 (BB played Backlash Fields on Rounds 1 and 3; Heroes had no Ongoing Destruction) BB was flipped and at 13HP.

NOTE: Commonwealth was at a PRDO of 6.0 when he was incapped. Though that value will not count towards his final stats, at this point, he would have an average PRDO of 7.90 (+1.79 SD above Mean) which would be acceptable, but also would be above all of the original 26 Heroes except for Haka [8.94 / +2.30] and Ra [8.64 / +2.15])

NOTE: KNYFE's final Turn included 8 plays, 4 Powers, and 8 Draws.

#1014: Digital Old School (22 May 2019)

Ra (0) / KNYFE (1) / Parse (0)

vs. Baron Blade @ Insula Primalis

Won when the second T-Rex appeared making BB's 3HP the target of the first T-Rex. The team that took down Iron Legacy barely makes it out alive on the default SotM scenario.

#1015: Third-Party Hero-Testing: Commonwealth (#3; 23 May 2019)

Ra/KNYFE/Commonwealth vs. BB @ MDP

Win 2 or 5 / Flip 5 / Win 6

HP: Ra .63 / KN .63 / Cw .60

DO: Ra 30 / KN 33 / Cw 43

PRDO: Ra 5.0 / KN 5.5 / Cw 8.6

Share: Ra .28 / KN .31 / Cw .41

[after 2 wins: Survivability .30 (-0.22; OK) – PRDO 9.20 (+2.43; unacceptable)]

#1016: Digital Old School (24 May 2019)

Ra (removed) / KNYFE (0) / Parse (removed)
vs. Ambuscade (2) @ Final Wasteland // Lost

#1017: Digital Old School (rematch) (24 May 2019)

Ra (16) / KNYFE (13) / Parse (12)
vs Ambuscade @ Final Wasteland // Won

#1018: Digital prototype-Vanguards (24 May 2019)

Ra (8) / Fanatic (4) / Tempest (0) / KNYFE (0) / Parse (0)
vs. Progeny @ Megalopolis // Won

#1019: Digital Vanguards (28 May 2019)

Ra (13) / KNYFE (10) / Parse (16) / Fanatic (16) / Tempest (20)
vs. Baron Blade @ Insula Primalis // Won

#1020: Digital Vanguards (28 May 2019)

Ra (25) / KNYFE (26) / Parse (24) / Fanatic (24) / Tempest (24)
vs. Citizen Dawn (never flipped) @ Megalopolis // Won

#1021: Digital Vanguards (28-29 May 2019)

Ra (18) / KNYFE (15) / Parse (17) / Fanatic (14) / Tempest (0)
vs. Grand Warlord Voss @ Wagner Mars Base // Won
Awesome team synergy, well-timed Irreducible damage, and some nice luck with the timing of the two Meteor Storms.)

#1022: Digital Vanguards (29 May 2019)

Ra (14) / KNYFE (15) / Parse (16) / Fanatic (5) / Tempest (17)
vs. Mad Bomber Blade @ Realm of Discord // Won in 3 Rounds

#1023: Digital Vanguards (29 May 2019)

Ra (10) / KNYFE (4) / Parse (0) / Fanatic (9) / Tempest (10)
vs. Omnitron-I @ Omnitron-IV // Won

#1024: Digital Vanguards (30 May 2019)

Ra / KNYFE / Parse / Fanatic / Tempest
vs. Omnitron-II (26) @ Time Cataclysm // Lost...
...but the card game ruling is that One-Shots never “enter play”. The Video Game violated that rule which set up a cascade of events that cost the team a minimum of 16 damage that would have been dealt to Omnitron, and quite possibly cost them the game.

#1025: Digital Vanguards (31 May 2019)

Ra (24) / KNYFE (22) / Parse (16) / Fanatic (23) / Tempest (21)
vs. Ambuscade @ Rook City // Won

#1026: Digital Vanguards (1 June 2019)

Ra / KNYFE / Parse / Fanatic / Tempest
vs. Matriarch (3) @ Maerynian Refuge // Lost

#1027: Digital Vanguards (1 June 2019)

Ra / KNYFE / Parse / Fanatic / Tempest
vs. Matriarch (11) @ Maerynian Refuge // Lost

CONCLUSION: Maerynian Refuge is a horrible place to fight the Matriarch.

NOTE: In the Quest for 100 Heroes department: Apple Jack, Eirelle, Enyo, Ishtar, Semi-Heroic Baron Blade, Timepeace, Whiplash, and Xander have all been laminated.

#1028: Third-Party Hero-Testing: Commonwealth (#4; 2 June 2019)

Ra/KNYFE/Commonwealth vs. BB @ MDP
Win 3 or 5 / Flip 3 / Win 4
HP: Ra .53 / KN .50 / Cw .20
DO: Ra 24 / KN 72 / Cw 28
PRDO: Ra 6.0 / KN 18.0 / Cw 7.0
Share: Ra .19 / KN .58 / Cw .22

NOTE: Ra played Imbued Fire on Round 1. KNYFE played 3 Battlefield Experiences in 4 Rounds. Commonwealth played Strength of Many on Round 1 and didn't play a clone until Round 4.

NOTE: Commonwealth has a PRDO of 8.47 (+2.07 SD) after 3 games. While high, this is only slightly into the unacceptable range. (PRDO of 8.33 (+2.00 SD) is acceptable. Anything between there and Haka's 8.94 is borderline, but technically acceptable.)

#1029: Digital Vanguards (2 June 2019)

Ra / KNYFE / Parse / Fanatic / Tempest
vs. Matriarch @ Mobile Defense Platform // Lost

#1030: Digital Vanguards (2 June 2019)

Ra (2) / KNYFE (2) / Parse (2) / Fanatic (0) / Tempest (5)
vs. Matriarch @ Mobile Defense Platform // Won

#1031: Digital Team Freedom (3 June 2019)

Legacy (17) / Ra (13) / Fanatic (20) / Tempest (5) / Heroic Luminary (17)

Ra/KNYFE/Commonwealth vs. BB @ MDP // Lost

#1033: Third-Party Hero-Testing: Commonwealth (#6; 6 June 2019)

Ra/KNYFE/Commonwealth vs. BB @ MDP // Lost

BB played: (1) 2nd MDP; (2) Backlash Generator; (3) Shield; (4) Doom, Doom, Devious Disruption. By this point it was basically over Commonwealth went down in Round 5 with Ra and KNYFE following rapidly in Round 6.

#1034: Third-Party Hero-Testing: Commonwealth (#7; 6 June 2019)

Ra/KNYFE/Commonwealth vs. BB @ MDP

Win 4 or 5 / Flip 3 / Win 4

HP: Ra .10 / KN .07 / Cw .00

DO: Ra 103 / KN 43 / Cw 33

PRDO: Ra 12.9 / KN 5.4 / Cw 4.7

Share: Ra .58 / KN .24 / Cw .18

#1035: Third-Party Hero-Testing: Commonwealth (#8; 6 June 2019)

Ra/KNYFE/Commonwealth vs. BB @ MDP // Lost

BB Flipped and at 8HP when his Slash & Burn and SOT damage took out the whole team at once.

#1036: Third-Party Hero-Testing: Commonwealth (#9; 6 June 2019)

Ra/KNYFE/Commonwealth vs. BB @ MDP

DO: Ra 60 / KN 35 / X 6

PRDO: Ra 10.0 / KN 7.0 / X 1.2

Share: Ra .59 / KN .35 / X .06

#1038: Digital Vanguards (8 June 2019)

Ra/KNYFE/Parse/Fanatic/Tempest

vs. Akash'Bhuta (30) @ Silver Gulch 1883 // Lost

#1039: Game Night @ Dan's (9 June 2019)

Dan / Commonwealth

Bethany / Guise

MJA / Xander

vs. Ennead (faced 5 of the gods)

@ Fort Adamant

Initially this team seemed like one that might have difficulty with any game, and versus the Ennead seemed like an especially big challenge. But about halfway through the game, Xander throwing effects on Commonwealth and Guise copying Commonwealth's cards and/or powers (to often ridiculous effects) gelled into a suddenly very cohesive team. The team ended up in single digit HP but won with potential left over.

#1040: Digital Rogue Warriors Plus (10 June 2019)

#1044: Digital Girls' Night Out (13 June 2019)

Young Legacy (9) / Fanatic (9) / KNYFE (14) / Parse (10) / Idealist (4)
vs. Kismet @ Omnitron-IV // Won

#1045: Third-Party Hero-Testing: Xander, Game 2 (14 June 2019)

PRDO: Ra 10.3 / KN 10.3 / X 1.4

Share: Ra .47 / KN .47 / X .06

#1046: Digital Random (14-17 June 2019)

Tempest / Luminary / Naturalist vs. Gloomweaver @ Maerynian Refuge
DRAW: After several hours of play across an entire weekend, the Villain, Environment, and even Hero targets had so much Damage Reduction in play that no more than 2-3 damage was being dealt in any ROUND. There was even two consecutive Rounds where no damage was dealt at all. Given the Damage Reduction and the fact that Tempest had healing available and there were more than enough Ongoing to protect that healing from destruction, I could have kept the team going forever, but given that they were only able to hit Gloomweaver (and only Gloomweaver) for a maximum of 2 damage every few Rounds, it could have taken many more hours across several more days before they would have seen any substantial progress.

CONCLUSION: Maerynian Refuge is probably not a good place to face many of the Villains. Going to have to try it with Baron Blade and see if I can figure out the proper mechanics for defeating a Villain without the Environment sending the battle off the rails.

#1047: Digital Team Freedom (17 June 2019)

Legacy (26) / Ra (25) / Fanatic (25) / Tempest (22) / Heroic Luminary (26)
vs. Baron Blade @ Maerynian Refuge
Won just before 3rd Environment Turn.

CONCLUSION: I think the key to winning in the Refuge is either rapidly defeating the villain, Environment control, or some combination.

Legacy (12) / Ra (14) / Tempest (11) / Nightmist (0)
vs. Skinwalker Gloomweaver @ Mobile Defense Platform // Won
(Quite possible the best opening hands and best Draws ever:
Legacy: Inspiring Presence @ Start; drew several daage cards and the Legacy Ring
for the extra contribution in the final round.
Ra: Imbued Fire @ Start; drew Staff, 2 Flame Spikes, 2 Living Conflagrations; dealt
16 damage two Turns in a row and 9 damage in between with NM's incap power.
Tempest: Electrical Storm and Hail Storm at Start; drew 2 Ball Lightnings, Shielding
Wind, had Flash Flood waiting to dodge the potential MDP crash.
Nightmist did a massive hit that cleared Glommy's minions, hit him hard, and then
took herself out before she would have hit the other Heroes. Pretty sure this group
with these hands would have taken Iron Legacy down.)

I was assuming this one would be a loss when, 6 rounds in BB was still on his front side with 22HP and his third MDP in play and Ra had yet to draw much of anything and all three Heroes at half or less HP. Timepeace shenanigans put Imbued Fire in play and the heroes were finally off and running, but it still looked like way too little, way too late. On BB's Turn in round 9 (flipped and @ 13HP), he incapped KNYFE and Timepeace and left Ra with 1HP. Ra played Scorched Earth for 6 (BB @ 7) and used Pyre for 3 (BB @ 4). KNYFE's Incap Use-a-Power triggered Pyre again for 3 (BB @ 1). Timepeace (who had stacked 2 Scorched Earths at the top of Ra's deck earlier) used his Incap Play-top-card-of-Deck and Ra's second Scorched Earth of the Round finished BB off.

This makes (at least) the 5th time that I've won with a single Hero standing and at 1HP, and the 3rd time that said Hero was Ra.

#1096: Third-Party Hero-Testing: Timepeace #2 (19 July 2019)

Ra / KNYFE / Timepeace vs. BB @ MDP

Lost. This was pretty close. Had BB played a Personal Forcefield, he still would have incapped Ra (Timepeace was already down and KNYFE was at 1HP.), but KNYFE would have been able to get past DR1 to finish BB's 5HP. Timepeace might be a lot of fun in a 4-5 Hero game, but in a 3 Hero damage race, he's basically just there to absorb some damage.

Lightwave is two teams of Heroes, founded by Baron Blade's daughter Luminary after he succeeds in killing a number of Heroes (Freedom 5, Young Legacy, Visionary, Argent Adept, Nightmist, Expatriette, and Mister Fixer) by destroying the Wagner Mars Base (and much of Mars).

Lightwave Beta is: Fanatic, KNYFE, Tempest, Mainstay and Setback.

Timepeace becomes Hero #93 in my collection.

He's interesting, and in 4-5 Hero games might be a lot of fun, but his abilities and synergies are very situational, as are his support cards, so while he qualifies for inclusion in my collection, I don't see him hitting the table often.

Scything becomes Hero #97 in my collection.

NOTE: Semi-Heroic Baron Blade (technically “Baron Blade, Hero (For the Moment)”) was previously run through the Third-Party Hero-Testing process and found to be overpowered by Derek Quintinar. However, I discovered that the version that he was using was not the most recent version available. I decided that at least a partial re-test was in order, even though my instincts as a playtester told me he was still OP. The following two games convinced me that the deck, as written, can not be added to my collection. DQ's stats will remain the official stats for the deck.

SHBB's Survivability is at nearly 4SD above the mean at this point, meaning it would (over the course of a normal test) almost certainly still be unacceptably high.

8 November 2019: I found the notebook where I was recording early games. Some of them were on the recovered webpage. Some of them were the Parse and Young Justice Third-Party Hero-Testing games (already accounted for, but it was fun to see the actual records). Here are the games that were previously considered irrevocably lost (note: numbering is from that source):

Game #104: vs. Dendron @ Enclave of the Endlings

Game #106: vs. Mad Bomber Blade @ Mobile Defense Platform

Lady of the Wood (Scott)
Nightmist (Will)

16 November 2019 Game Night

No Sentinels but tried Marvel Champions (clearly competing with SotM, it is a cooperative superhero card game). It has some interesting points but it is extremely fiddly, and doesn't feel like a complete game out of the box. Also the \$60 price tag of the base set and the \$15 (or more) for each MONTHLY expansion makes it seem unlikely to gain much traction, at least here in the Boise gaming scene. (For the record, we lost badly. With one fewer bad card draws, we might have hung on an extra round or two, but the loss was clearly inevitable by round 3.)

Also played Silver Amulet. Fun. Interesting. Elements of memorization, risk, unseen resource management. Probably only worked well with 4+ players. Played over four rounds (multiple ways for a round to end) with the lowest score winning the game. (I had two good rounds, one average, and one horrible, ending in third place.)

Geisha, the first known Third-Party Hero, finally got tested. I'd already counted her as part of my collection given the general assumption (born out here) that her deck is on the under-powered side.

(May 2020) Green Ronin released Print-and-Play copies of several decks including Bowman, apparently to "celebrate" the game now officially being 25 months late. Near the end of playtesting, Christopher stated that version 6 of Bowman was final, so I decided to take a chance and run him through the full 3PHT scenario. Comparing the v6 Playtest and PnP/Proof decks, it turns out that it was indeed final, so Bowman is now, Officially, complete.

Akash'Thriya tested out OK (though on the high side as all OblivAeon Heroes to date). Ra played Imbued Fire in games 1, 2, 3, and 5 and was magnificently set-up in Game 5. Combined with playing Scorched Earth on an Environment padded by Akash, and Ra pulled off four spectacular games, including new records for total Damage Output (216), single game PRDO (30.9), and five-game PRDO (17.38). A Third-Party Hero with those stats would have been immediately banned, but I have to say it was fun smacking the Baron around like that.

NOTE: I figured if I was ever going to try recording a 3PHT game as a Digital game, Benchmark was the character to use. Keeping track of everything accurately, combined with allowing for the (mostly slight) differences in the rule interpretations between the physical and digital games, is just more hassle than it's worth.

NOTE 2: Yes, I know that the digital game is now considered by GtG to be the official arbitrator of the rules, however, I have tested all of the heroes to date using the pre-digital "official" rules interpretation, and I intend to continue to do so.

After three games T.A.C. is at a Survivability of .32 (exactly average), but a Per Round Damage Output of 8.47 (2.07 SD above the Mean). For comparison, the only three Heroes with a higher PRDO are Haka (8.94 PRDO, +2.30 SD above the Mean of 4.22), Ra (8.64 PRDO, +2.15 SD above), and Hype (non-BGG custom Hero from KillerShrike, 8.63 PRDO, +2.15 SD above). The other 100 Heroes tested to date all have lower PRDO.

Ra / KNYFE / Tucker vs. BB @ MDP // Lost

All three Heroes had horrible hands and worse draws. Staff of Ra and Tucker's various Handguns never entered play. KNYFE got her Conduit Blade but only late in the game. Despite this the team had Blade flipped and down to 3HP when he took out the ladies with a Devious Disruption. Tucker managed 19 damage in 6 rounds.

#1308: Glass Assassins (v1) Playtest (23 Jan 2021)

Ra / KNYFE / Titan vs. Glass Assassins @ MDP

Won in 5 Rounds. Statuettes have too many HP, too much healing, and too little agency to be worth the Heroes' attention. Glass Assassins are too fragile and don't do enough damage.

#1309: Glass Assassins (v2) Playtest (24 Jan 2021)

Ra / KNYFE / Bardac vs. Glass Assassins @ MDP

Won in 4 Rounds. Glass Assassins are still too fragile. They are also very ineffective when they have no Statuettes in play.

#1310: Glass Assassins (v3) Playtest (24 Jan 2021)

Ra / KNYFE / Bardac vs. Glass Assassins @ MDP

Won in 4 Rounds. I'm mostly happy with the deck at this point, but the Villain card is still too fragile. I'm splitting the Glass Assassins into a Rules card and three Character cards (33/22, 33/22, 33/incap) and spreading the Villain effects between them. Will print and test later today.

#1326: Glass Assassins (playtest v.5) (24 Feb 2021)

Ra / KNYFE / Assistant Librarian vs Glass Assassins @ MDP

Ra had Imbued Fire in initial hand and played it round 1.

First 2 rounds were pretty ineffective for the Heroes.

Round 3, Kaia went down and good damage to the others.

Round 5 flipped GA, plus some damage on the back side.

Round 6, Hero Victory (Ra 12HP, KN 5HP, AL 2HP).

Without Imbued Fire, this probably would have been a loss.

#1327: Guns Blazing versus Glass Assassins v.5 (24 February 2021)

Stuntman / Gun Club Tucker / Gun Club Violet Parr

vs. Glass Assassins @ MDP

The Heroes were in trouble and only able to do minor damage right from the start. Round 8, they took down Maia, but were at 7, 7, and 3 HP.

Violet went down in round 10, followed by Tucker in round 11.

Incap abilities and Stylish Armor allowed Stuntman to continue alone.

Glass Assassins flipped in round 13.

Round 15 and 16, Stuntman could not use powers.

Round 17, Stuntman down to 1HP when his normal shenanigans plus incap abilities allowed him to finish off Jaia for the win.

#1329: Third-Party Hero-Testing: Assistant Librarian #4 (25-26 Feb 2021)

Ra / KNYFE / Assistant Librarian vs. BB @ MDP // Lost

Ra & KNYFE both had bad opening hands. Assistant Librarian's insane draw allowed KNYFE to finally set up and in Rounds 7 and 8, she managed 23 damage each Round. Combined with Ra's damage, this took Baron Blade from 26HP on the front side down to 4HP on the backside. Unfortunately, by that point, Ra and KNYFE were also down to 4HP each and Assistant Librarian was incapped, and Baron Blade finished them off before Ra's 9th Turn.

#1344: SotM:DE TableTop Simulator Game (5 March 2021)

Legacy, Ra, Alpha vs. Baron Blade @ Freedom Tower.

Blade had a good first turn. The rest of the game belonged to the Heroes. Alpha was fun. Only got up to Rank Two Aspect, but frankly that was enough in this game because Ra was doing such good crowd control on Blade's targets that Alpha ended up hitting Blade and one of the Heroes each time she dealt damage.

#1348: Greatest American Hero, playtest v2 (8 March 2021)

Ra/KNYFE/GAH vs BB @MDP // Won

GAH: .46 Survivability / 7.2 PRDO

Pyrokinesis with Ra (or any target(s) that deal lots of Fire damage) is ridiculous, but without Ra, it's basically a dead card. And you only have (maximum) one chance per game to pick a specific Suit Power, so I feel like it doesn't have to change. Telekinesis is also good, and both Suit Powers are boosted by Strength, which combines to explain the more than doubling of GAH's PRDO.

I'm going to post the deck to the Custom Playtesting Discord (and maybe see if I can build a TTS version), but I'm leaning towards considering this deck done (or done enough to build the real cards).

TTS deck successfully built and posted. Guess I'm going to have to get the rest of them up there at some point.

Chase on the Custom Playtesting Discord is converting the Daybreak Heroes from the RPG to SotM. Rockstar is pretty far along with art and a lot of digital testing, so I volunteered to help test the ones that are still at the text-only stage.

#1349 / 1350 / 1351: Headlong (12 March 2021)

Ra / KNYFE / Headlong vs. BB @ MDP // Won all 3

Headlong Survivability: .74 / .67 / .41 → .61 (still high but trending downward)

PRDO: 9.3 / 6.3 / 8.1 → 7.90 (Ra's Imbued Fire is helping these stay high, but as a deck not designed as a damage-dealer, it's still high; Chase seemed very open to (and thankful for) the feedback.)

Thematically, Headlong feels like a speedster hero who is still very inexperienced, so that is pretty awesome for a deck this early in development.

vs. Glass Assassins @ HMCS Moondancer (Rob Brown's Case Files)
Won; KNYFE finished off the assassins, using a Power on Ra's turn, her own, and Terminus' turn.
I will be making a couple of minor tweaks to the deck (Maia's flip will attack the highest HP, not lowest), but mostly I'm pretty happy with it. The two games with the current version have been very narrow victories.

#1361-1362: Third-Party Hero-Testing: Aeon Girl (v1) (22 March 2021)

Ra / KNYFE / Aeon Girl vs. BB @ MDP

Won game 1

Ra 11HP; 63 in 7 / KN 11HP; 83 in 7 / AG 4HP; 20 in 6
AG avoided all of her self-damage easily and healed 12 damage (with much of her potential healing lost due to the team being at full HP). And the team was able to eat an 11 point Round 6 Devious Disruption with no loss of set-up.

Won game 2

Ra 2HP; 43 in 6 / KN 2HP; 54 in 6 / AG incap; 32 in 5

Ra's Imbued Fire screwed up AG's damage manipulation abilities. 14 of her damage was to herself. She also healed for 14. Final HP totals were due to the final round Devious Disruption. (We blew up AG's set-up knowing that she was going to get incapped by BB anyhow. Remaining set-up was more than enough to finish Blade.)

CONCLUSION: Aeon Girl is supposed to be the main Damage Dealer for Daybreak, but she's not much of a blaster at this point (.08 Survivability with 4.85 PRDO).

#1363: Third-Party Hero-Testing: Drift #2 (24-25 March 2021)

Everyone's opening hands and draws were crap. Meanwhile BB built up DR2 and double-backlash. Did some quick math and forfeited rather than play out the disaster.

#1433: Third-Party Hero-Testing: Muse (PT v1) #1 (8 May 2021)

Ra / KNYFE / Muse vs. BB @ MDP // Won

From Discord:

YakGuardian (Michael; he/him) — Today at 6:58 AM

@Chase [Daybreak+, He/Him] OK. I got a game in with Muse. (standard:

Ra/KNYFE/Muse vs BB @ MDP). Result: Hero victory with 5, 3, and 2 HP left.

1) Heroes would have absolutely lost without Muse's incredible draw support.

Telepathic Coordination (at SOT, Muse draws. PWR: Muse + 1 Hero draws; player who hasn't drawn, plays) was round 1 play. This got KNYFE's Kinetic Neutralizer in play early than it would have, which helped offset her horrible opening hand and consistently bad draws, and let Ra rain fire down on Blade at a much faster pace.

2) Perfect Intuition (Muse may use add'l power. 1/turn: when Muse would deal self psychic, you may redirect.) I was concerned about this card when I was putting the playtest cards together. Most Heroes that have a "use an extra power" card have it as a one-shot; I thought it being an Ongoing might be an issue. Muse got it into play in round 3 and kept it for the remainder of the game. Turns out, with her mostly Support powers, that it didn't feel OP at all. In fact, without it, she would have likely felt UP and I would have likely lost the game.

3) Inner Demons (PWR: destroy Villain Ongoing. Deal targets in the destroyed

card's play area 2 irreducible psychic. destroy this card. (also has 2 ongoing effects; neither ever triggered)). This was a life saver as Blade got both Backlash Fields out. Given that he was slamming out Hasten Dooms nearly every turn, the Heroes couldn't have survived with the Backlashes in play. Despite there being only 2 copies, Muse had one in hand each time Blade played Backlash and was able to get rid of them with little damage to the team.

4) Visionary Guidance (each Hero shuffles up to 2 cards from trash into deck. Each Hero who does so regains 1HP. Muse draws 2) I mostly just wanted to call this card out because I like it. (It is also likely the reason I was able to get the second Inner Demon in hand just in time to need it.)

YakGuardian (Michael; he/him) — Today at 6:58 AM

OVERALL) Never saw any of her Projection cards, so I can't really comment on those, but her extraordinary draw support was fantastic without feeling OP. In 7 rounds, Ra saw at least a third of his deck and had at least 3 extra plays, while KNYFE burned through over half of her deck (man, her deck sucks some times) and Muse ended the game with over a third of her deck in hand (In round 6 I was choosing between 5 cards, any of which would have been useful at that point). Muse only did 10 damage, and 4 of that was due to Imbued Fire (which, in turn, came out early due to Telepathic Coordination), but her support more than made up for her sitting out the damage race. I'd like to see what happens when she gets Projections to play (I had a bunch of cards in hand at the end that weren't very useful without Projections to power or be powered by them), but based on a single play, I enjoyed the deck.

I think two copies of most of her cards is fine. Given her draw support, she's still pretty likely to see a decent majority of her cards in a typical length game. Again, I'd like to get in another game or two (especially one with Projections actually hitting the table), but I think she's in a pretty good spot for version 1.

This was the type of “perfect storm” game that demonstrates the need to do a 5-game average for stats. KNYFE started the game with the Gauntlet in hand. Pyre gave Ra an early out-of-turn card play: Excavation brought Imbued Fire into hand three turns early. Between Pyre's out-of-turn Power uses and Ra's Imbued Fire, KNYFE dealt 82 points of damage, mostly on Turns 4 and 5, including a 36 point round (all to BB, taking him from 35HP to flipped) and destroying BB's Backlash Field with almost no damage taken from it. KNYFE did most of the damage on BB's backside as well.

#1514: Custom Sentinels Playtesting Discord TTS Game (4 March 2022)

MJA / Ningguang

WhiteEyes1989 / Abathur: Evolution Master

Zontan / Joyce: Support Speedster

Zerami / Sayu

vs. Akash'Bhuta @ Nexus of the Void

Zerami's TTS crashed, but by that point the win was assured. WhiteEyes1989 felt that Abathur was boring to play. Zontan had a blast playing Joyce, who to me seemed possibly OP. I had a blast playing Ningguang, to the point that I prepped the deck for printing that same evening.
